## The Benefits of Blended Learning

At Champion Learning Academy, we are taking steps to enhance the learning experience of all our students. One of the ways that we are making this possible is taking advantage of a blended learning environment, combining the best features of traditional onsite learning, as well as utilizing technology available with online learning. Research has noted that the combination of these factors encourages improved tracking of student progress, communication between student, parent; staff, personalized instruction, improved student outcomes. And enhancing positive interaction among the students. This will occur in a classroom setting that will use laptops, projectors, whiteboards in aiding in teacher instruction and student learning.

\*This schedule is subject to change.
